

Item P12-1862

Bosch 5" Concrete Surfacing Grinder with Dust-Collection Shroud

The Bosch CSG15 5" Concrete Surfacing Grinder has a dedicated dust-collection shroud for a cleaner work environment, as well as plenty of power. It delivers 12.5 AMPs and up to 9,300 RPM, for concrete grading, surface preparation and other tough concrete applications. Its dedicated dust guard system is a comprehensive solution for collecting dust that allows grinding flush against walls. The system helps to provide a longer operational life, including a sealed motor and a sealed switch. It also has double-sealed ball bearings and two lip-sealing rings to protect against dust contamination. With Constant Response™ circuitry, this grinder's motor can handle extended operational load, which allows the user to reach areas where walk-behind unit can't touch. Its spindle lock allows for quick wheel changes, it has a wrap-around auxiliary handle and it includes Service Minder™ brushes. **Includes: auxiliary handle, flange kit, spanner wrench, 5" diamond cup wheel, surface guard with vacuum connection and carrying case. Designed to be used with Bosch's Model VAC140A Wet/Dry Vacuum system, and [Bosch Diamond Cup Wheels](#).**

Specifications		
Maximum wheel diameter		5"
No-load speed (RPM)		9,300
Amps		12.5
Arbor size		7/8"
Spindle thread		5/8"-11
Tool weight		5.95 lbs.
Tool length		13 3/4"
