

Item P19-1095

Brisk Heat 55 Gallon Mid-Temp Drum Heater

BriskHeat's DHLS silicone band heater is an excellent source of heat for warming and reducing viscosity in many materials. The 4" wide wrap-around band heaters deliver an even heat to nearly the entire circumference of the container, ensuring an efficient and controlled warming process. A built-in dial control is used to adjust the heat output of the heater to a maximum setting of 160°F (71°C) while avoiding overheating and scorching the product. 120V.
